

SERVICE LETTER

Documentation for ROTAX® Aircraft Engines

ATA System: 00-00-00 General

1) Planning information

To obtain satisfactory results, procedures specified in this publication must be accomplished with accepted methods in accordance with prevailing legal regulations.

BRP-Rotax GmbH & Co KG cannot accept any responsibility for the quality of work performed in accomplishing the requirements of this publication.

1.1) Applicability

All versions of ROTAX® engines types:

Engine type	Serial number
916 iSc A	all
916 iS A	all
916 iSc B	all
915 iSc A/C24	all
915 iS A/C24	all
912 iSc Sport	all
912 iS Sport	all
912 iS	all
912 A	all
912 F	all
912 S	all
912 UL	all
912 ULS	all
914 F	all
914 UL	all
2-stroke aircraft engines	all

1.2) Concurrent ASB/SB/SI and SL

In addition to this Service Letter the following Service Letter must be observed and complied with:

SL-916 i-002/SL-915 i-002/SL-912 i-010/SL-912-021/SL-914-019/SL-2ST-013, title „List of Applicable Publications for ROTAX® Aircraft Engines“, current issue.

1.3) Reason

In course of introduction of a new document type called SI-PAC, the structure of the technical documentation for ROTAX Aircraft Engines has been extended.

1.4) Subject

Documentation for ROTAX Aircraft Engines.

SERVICE LETTER

1.5) Compliance

NONE - For Information Only.

1.6) Approval

The technical content of this document is approved under the authority of the DOA ref.
EASA.21J.048.

1.7) Labor time

None.

1.8) Mass data

Change of weight - - - none.

Moment of inertia - - - unaffected.

1.9) Electrical load data

No change.

1.10) Software modifications

No change.

1.11) References

None.

1.12) Other Publications affected

None.

1.13) Interchangeability of parts

- Not affected

2) Material Information

- Not affected

SERVICE LETTER

3) Accomplishment/Instructions

3.1) Structure of the documentation

The documentation has been split according to use, as follows:

Documentation	Abbreviation	Contents
Operators Manual	OM	The Operators Manual contains information for the OEM and is one important source for the flight manual. The Manual is subdivided into description of design, technical data, handling operations, checking, trouble shooting and list of authorized distributors.
Maintenance Manual (Line)	MML	The Maintenance Manual contains information about specified Maintenance ("Line Maintenance"). It is subdivided into maintenance schedule, operating-hours-related checks, periodic maintenance and special checks. The Maintenance Manual has to be used together with the Maintenance Manual of the aircraft manufacturer or with the content incorporated.
Maintenance Manual (Heavy)	MMH	The Maintenance Manual contains information about maintenance tasks beyond the scope of the Maintenance Manual ("Line Maintenance"). The Maintenance Manual ("Heavy Maintenance") is planned for use in aircraft- and repair facilities. It is subdivided into maintenance of the different systems, maintenance of components, table of wear limits and form sheets.
Installation Manual	IM	The Installation Manual contains information about installation of the engine into the aircraft and is intended for use by aircraft manufacturer. The Manual is subdivided into installation dimensions, preparation for engine installation, definition of engine suspension, fitting positions and installation notes of the individual systems.
Overhaul Manual	OHM	The Overhaul Manual contains information about a general overhaul of the engine. The Overhaul Manual is exclusively for use in approved overhaul facilities. The Overhaul Manual is subdivided into information, instructions and guidelines about engine overhaul and form sheets, etc.
Illustrated Parts Catalog	IPC	The Illustrated Parts Catalog contains an exploded view of all parts of the engine with part number and quantity per engine.

SERVICE LETTER

Documentation	Abbreviation	Contents
Alert Service Bulletin	ASB	Contains instructions for accomplishment of certain safety tasks within a specified period.
Service Bulletin	SB	Contains instructions for accomplishment of certain tasks within a specified period of information of design changes.
Service Instruction	SI	Contains instructions to assist the aircraft manufacturer and aircraft mechanic/keeper to warrant correct conditions of operation and installation.
Service Instruction - Parts and Accessories	SI-PAC	Contains instructions to assist the aircraft manufacturer and aircraft mechanic/keeper to warrant correct conditions of spare parts scope, operation, installation and maintenance of PAC parts. “PAC” Service Instruction Documents provide detailed information on non-certified ROTAX® Aircraft Engine Parts, Accessories and Clothing. Referenced parts and accessories are provided without EASA certification or ASTM compliance. Certification/Compliance of referenced Parts and Accessories must be completed by the aircraft OEM.
Service Letter	SL	Contains information to assist the aircraft manufacturer/keeper to warrant proper conditions of operation and installation.
Circular Letter	CL	Letter informing distributors about coming up release of a new / updated manual or service document with binding as well as obligatory instructions.

3.2) Summary

The execution of the Service Letter must be confirmed in the logbook.

NOTE:

Work on EASA certified parts might affect the EASA Form 1 and does require appropriate documentation by authorized persons. Repairs must be entered into the engine logbook and also do apply for the EASA Form 1.

A revision bar outside of the page margin indicates a change to text or graphic.

Translation into other languages might be performed in the course of language localization but does not lie within ROTAX® scope of responsibility.

In any case the original text in English language and the metric units are authoritative.

3.3) Inquiries

Inquiries regarding this Service Letter should be sent to the ROTAX® Authorized Distributor of your area.

A list of all ROTAX® Authorized Distributors or their independent Service Centers is provided on <https://dealerlocator.flyrotax.com>.
